

**INCIDENT MANAGEMENT SITUATION REPORT  
MONDAY, JULY 10, 2006 – 0530 MDT  
NATIONAL PREPAREDNESS LEVEL 3**

**CURRENT SITUATION:**

Initial attack activity was moderate nationally with 219 new fires reported. Four new large fires (\*) were reported, three in the Southern California Area, and one in the Rocky Mountain Area. Five large fires were contained, three in the Rocky Mountain area, and one each in the Northern Rockies and Northern California Areas. Very high to extreme fire indices were reported in Arizona, California, Minnesota, Montana, Nevada, New Mexico, North Dakota, and South Dakota.

A Type 1 Incident Management Team (Opliger) is assigned to incident C10157 located 60 kilometers west of Quesnel, British Columbia, Canada.

**WESTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:**

BEATTY COMPLEX, Battle Mountain Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Saleen) is assigned. This complex is comprised of the Beatty and Sawtooth fires, is five miles east of Beatty, NV in grass and brush. Winds from passing thunderstorm cells hampered containment efforts. Rapid rates of spread were reported.

MCCONNELL, Winnemucca Field Office, Bureau of Land Management. This fire is five miles southeast of Orvada, NV in grass and sage. No further information was received.

CYANCO. Winnemucca Field Office, Bureau of Land Management. This fire is 10 miles south of Winnemucca, NV in grass and brush. Rapid rates of spread were reported.

BLUE MOUNTAIN, Winnemucca Field Office, Bureau of Land Management. This fire is 16 miles west of Winnemucca, NV in grass. No further information was received.

LINCOLN COUNTY COMPLEX, Ely Field Office, Bureau of Land Management. A Type 2 Incident Management Team (Suwyn) is assigned. This complex is ten miles south of Caliente, NV in grass, sagebrush, juniper and pinyon pine. No new information was reported.

**SOUTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:**

ARCO, Kern County Fire Department. This fire is located five miles north of Lebec, CA burning in chaparral. Steep terrain and difficult access are impeding containment efforts. Numerous

residences and utility infrastructure are threatened. Interstate 5 was temporarily closed. A moderate rate of fire spread was observed.

SAWTOOTH COMPLEX, San Bernardino Unit, California Department of Forestry and Fire Protection (CDF). This complex is near Pioneertown, CA, burning in chaparral. Numerous residences are threatened. Weather and steep terrain are hampering containment. Winds from passing thunderstorm cells increased the fire activity and rate of spread.

PUSHWALLA COMPLEX, Joshua Tree National Park. This complex, comprised of the Pushwalla and Berdoo fires, is in Joshua Tree National Park. Steep terrain and wind are hampering containment. Creeping and occasional torching were observed.

MILLARD COMPLEX, San Bernardino National Forest. A Type 2 Incident Management Team (Walker) has been ordered. This complex is located seven miles north of Cabazon, CA, burning in chaparral and conifer. Steep terrain and weather are hampering containment. Active fire behavior and spotting were observed.

KINGSTON #2, California Desert District, Bureau of Land Management. This fire is 70 miles northeast of Baker, CA in grass and brush. Steep, inaccessible terrain is hindering containment. The fire is in patrol status.

#### NORTHWEST AREA INCIDENTS/LARGE FIRES:

SPUR PEAK, Okanogan/Wenatchee National Forest. A Washington Type 2 Interagency Incident Management Team (Jennings) is assigned. This fire is 13 miles northeast of Winthrop, WA in spruce and lodgepole pine. Forest road and trail closures remain in effect. Steep terrain and heavy amounts of dead and down fuel are hampering containment efforts. Minimal fire activity was observed.

## NORTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

YOLLA BOLLY COMPLEX, Mendocino National Forest. A Fire Use Management Team (Perkins) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. This fire is burning 35 miles west of Red Bluff, CA in timber. Increased fire activity on the southwest flank, short uphill runs, and spotting were observed.

## SOUTHERN AREA INCIDENTS/LARGE FIRES:

WHITEHAT, Texas Forest Service. This fire is 25 miles south of Sweetwater, TX in brush and hardwood slash. Several residences remain threatened. Mop up of the heavy fuels along the perimeter continues.

LINDSEY BAY, National Forests of Florida. This fire is five miles southeast of Wilma, FL in southern rough. No further information was received.

## OUTLOOK:

**Weather Discussion:** A low pressure trough will move into the Pacific Northwest as high pressure begins to weaken in the West. This will tend to shift the thunderstorm activity of the last few days eastward. California and the Pacific Northwest will also begin to cool off along and see higher humidity.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<b>Western Great Basin</b> Mostly sunny across the northwest third of Nevada, isolated thunderstorms elsewhere, some of which may have dry lightning.	Northern valleys: 86 to 101. Southern valleys: 93 to 110. Northern mountains: 75 to 90. Southern mountains: 75 to 90.	Northern valleys: 9 to 19%. Southern valleys: 12 to 20%. Northern mountains: 13 to 30%. Southern mountains: 15 to 22%.	South to west at 5 to 20 mph, localized gusts to 25 to 30 mph.
<b>Southern California</b> Areas of morning low clouds and fog coastal areas, otherwise mostly sunny, except becoming partly cloudy with isolated showers and thunderstorms over the Sierra and over the mountains and deserts of Southern California east of Cajon Pass in the afternoon.	80 to 95 mountains. 90 to 100 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.	40 to 60% coastal areas. 15 to 30% valleys. 15 to 30% Mountains. 10 to 20% Deserts.	Southeast to southwest 5 to 15 mph.
<b>Northwest Area</b> Scattered wet thunderstorms eastern third of the region. Otherwise sunny.	West of Cascades: 60s and 70s. East of Cascades: mostly 70s and 80s, and near 60 high Cascades.	West of Cascades: Mostly above 50% except lower elevations southwest Oregon 35 to 40%. East of Cascades: 15% to 25% flatlands and 25 to 45% mountains.	East of Cascades: Windy by evening. Becoming west to northwest 10 to 25 mph with gusts to 40. West of Cascades: west 6 to 12 mph.
<b>Northern California</b> Fog and low clouds along the coast and clear inland.	60s coast, 70s to 80s mountains, and 90s to 102 warmest inland areas.	15 to 30% driest inland areas.	Southwest to northwest 5 to 15 mph with afternoon gusts to 27 mph coast and east of the Cascade-Sierra crest and southeast to southwest 6 to 12 mph with afternoon gusts to 17 mph elsewhere.
<b>Rocky Mountain Area</b> Scattered to numerous showers and thunderstorms extending from eastern Wyoming and the Black Hills into Colorado, Kansas, and Nebraska.	70s to lower 80s at lower elevations with mid 60s to mid 70s in the mountains.	15 to 25% across the lower elevations of southeast Colorado and southwest Wyoming, with higher values elsewhere.	Light wind except 10 to 20 mph from the west in southern Wyoming and the Colorado mountains, and from the southeast across portions of the plains states.

<b>Geographic Area Weather</b>	<b>High Temperatures</b>	<b>Minimum Relative Humidity</b>	<b>Wind</b>
<p><b>Southern California</b> Areas of morning low clouds and fog coastal areas, otherwise mostly sunny, except becoming partly cloudy with isolated showers and thunderstorms over the Sierra and over the mountains and deserts of Southern California east of Cajon Pass in the afternoon.</p>	<p>80 to 95 mountains. 90 to 100 valleys. 90 to 100 upper deserts. 100 to 110 lower deserts.</p>	<p>40 to 60% coastal areas. 15 to 30% valleys. 15 to 30% Mountains. 10 to 20% Deserts.</p>	<p>Southeast to southwest 5 to 15 mph.</p>
<p><b>Southwest Area</b> Partly cloudy. Isolated thunderstorms across the mountains of Arizona. Otherwise, partly cloudy with widely scattered to scattered areas of thunderstorms across both New Mexico and west Texas.</p>	<p>Mid 80s to near 106 lower elevations. Mid 60s to the low 80s in the higher terrain.</p>	<p>15 to 25% lower elevations of Arizona, western New Mexico, and southwest Texas. 25 to 40% remainder.</p>	<p>Southwest to southeast 5 to 15 mph.</p>
<p><b>Northern Rockies</b> An upper level ridge will slide east across the Dakotas as the first piece of Pacific energy impacts the western portion of the area. This system will produce thunderstorms over Idaho and western Montana with a risk of some strong, gusty storms. Eastern Montana and western North Dakota will experience breezy, hot and dry conditions. Partly cloudy and not as hot over eastern North Dakota.</p>	<p>West of divide: 84 to 88. East of divide: 88 to 94. Western North Dakota: 85 to 90. Eastern North Dakota: 78 to 85.</p>	<p>West of divide: 18 to 30%. East of divide: 18 to 25%. North Dakota: 30 to 40%.</p>	<p>West of divide: west 10 to 15 mph. East of divide, southwest 10 to 20 mph. North Dakota: southeast 5 to 15 mph.</p>
<p><b>Eastern Great Basin</b> Idaho, Bridger-Teton: Partly cloudy with isolated afternoon thunderstorms over eastern mountains and western Wyoming. Northern Utah: Partly cloudy with isolated valley and scattered mountain afternoon showers and thunderstorms. Southern Utah, Arizona Strip: Partly cloudy with isolated valley and scattered mountain afternoon showers and thunderstorms.</p>	<p>Idaho, Bridger-Teton: 73 to 88 mountains, 85 to 97 valleys. Northern Utah: 73 to 83 mountains, 84 to 97 valleys, southern Utah, Arizona Strip: 73 to 88 mountains, 88 to 99 valleys. 100 to 110 low deserts.</p>	<p>Idaho, Bridger-Teton: 15 to 27% mountains, 12 to 20% valleys. Northern Utah: 23 to 40% mountains, 14 to 25% valleys. Southern Utah, Arizona Strip: 25 to 40% mountains, 13 to 24% valleys.</p>	<p>Idaho, Bridger-Teton: Southwest 10 to 15 mph. Northern Utah: upslope/upvalley 5 to 10 mph, west 10 to 15 mph at ridgetops. Southern Utah, Arizona Strip: upslope/upvalley: 5 to 10 mph,</p>
<p><b>Eastern Area</b> Scattered showers and thunderstorms across the Northeast and Mid-Atlantic states. Showers and thunderstorms likely over southwestern Missouri. Fair elsewhere.</p>	<p>65 to 75 over the northern Great Lakes. 85 to 90 across the southern Mid-Atlantic states. 75 to 85 elsewhere.</p>	<p>37 to 47% across the western and northern Great Lakes as well as the Iowa, Illinois, and Missouri. Greater than 45% elsewhere.</p>	<p>South at 10 to 20 mph across the Northeast, Missouri and southern Illinois. Light to moderate winds elsewhere.</p>
<p><b>Alaska Area</b> No information reported.</p>			
<p><b>Southern Area</b> No information reported.</p>

## **DOZER/TRACTOR PLOW OPERATIONS**

Dozers/tractor plows provide suppression and support capability for fire operations. When working on or around dozers on the fireline, it is important to respect the following guidelines:

- Load/unload equipment from the transport in a safe manner on a level, stable surface.
- Park transport in an area free of fuel. Clear an area if needed to protect parked equipment.
- Do not sit or bed down near equipment. Walk around the equipment before starting or moving it.
- Lower the dozer blade and/or fire plow to the ground when the equipment is idling or stopped.
- When working a dozer or tractor plow, stay at least 100 feet in front or 50 feet behind the equipment.
- Allow no one but the operator to ride on the equipment.
- Never get on or off equipment while it is moving.
- Provide front and rear lights for equipment working at night or in heavy smoke.
- Provide lights and fluorescent vests to personnel working with dozer/tractor plow units.
- Use hand signals for direction and safety. (See Fireline Handbook, Appendix A, for hand signals.)
- Do not use a dozer or tractor plow without a canopy or brush guard and radio communications.
- Operators will wear required PPE and carry a fire shelter.
- Be aware of different fuel types, rates of spread, and flammability.
- Watch for wetlands, steep slopes, rocks, ditches, and other obstacles that might stop the equipment.
- Do not get too far ahead of a firing crew during firing operations.
- Anchor the line to a secure firebreak and create a black line (burn out) until the fire is completely enclosed.
- Tractor plow operators should wear headgear protection for head, face, eyes, and ears while also providing radio reception and ventilation capabilities.
- Tractor plow crews should consist of a minimum of two people.
- When the dozer or tractor plow is equipped with a hand-clutch lever, always take equipment out of gear when mounting and dismounting.
